Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election *without traverse* of Embodiment II, claims 26-32, filed 3/27/06 is acknowledged. Claims 1-25 and 33-48 are withdrawn from consideration as being directed to non-elected embodiments.

Information Disclosure Statement

2. The Information disclosure Statement filed on 5/20/04 has been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 26-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Babala et al. (US 2004/0163470).

The figures and reference numbers referred to in this office action are used merely to indicate an example of a specific teaching and are not to be taken as limiting.

Regarding claims 26-32, Babala et al. (see specifically figures 3, 6 and 7, paragraph [0034] to paragraph [0083]) disclose a sensor mount (28/52) for mounting a motion sensor (e.g., the accelerometer 24/25/26) to an external object (e.g., the vehicle), the motion sensor being

Art Unit: 2891

capable of detecting motion along or about a sensor axis (paragraph [0036]), the sensor mount comprising: a mounting area for mounting the sensor (see Figs. 3 and 6); and a coupler system (94) that is capable of coupling to the external object (via four holes or orthogonal bushings) (see Fig. 7) in a manner that aligns the sensor axis with either one of first and second axes, the motion sensor being capable of detecting motion of the external object along or about the axis to which the sensor axis is aligned (paragraph [0042]). The motion sensor also detects the orientation of the sensor mount (paragraph [0038]). Babala et al. further teach the sensor mount having a lead frame (54) and the sensor being mounted to the lead frame to form an intermediate assembly, which is at least partially sealed by the cover (64) (see Fig. 6).
